Regular outreach & wellness campaigns

GOVERNANCE

Organizational Structure

Aclearhierarchyensuresaccountability,seamlesscoordination,andconsistent quality across every department and patient touchpoint.

INTERNAL ASSESSMENT

Strengths & Weaknesses

Strengths

- Multi-specialty care under one roof
- Strategic, high-traffic location
- Modern diagnostic and treatment equipment
- Integrated digital health infrastructure

Weaknesses

- New brand with limited market recognition
- Limited on-site parking capacity
- High initial setup and operational costs
- Staff recruitment and onboarding ramp-up

EXTERNAL ASSESSMENT

Opportunities & Threats

External forces will shape SAY TA MAN's growth trajectory. Proactive strategy turns emerging opportunities into competitive advantages — while building resilience against market pressures and operational risks.

LONG-TERM GOALS

A 5-Year Roadmap to Excellence

1

Year 1–2

Establish as a leading multi-specialty polyclinic in Yangon with EMR and online appointment systems

2

Year 2–3

Implement HIS, telemedicine, and digital queue management across all services

3

Year 3–4

Expand service lines and patient capacity; strengthen specialist teams

4

Year 5+

Grow into a small hospital, delivering accessible, affordable, high-quality care at scale

Our growth strategy balances patient demand, technology adoption, and regulatory compliance at every stage.

Building Myanmar's Smart Healthcare Future

SAY TA MAN Polyclinic is more than a medical facility — it is a **blueprint for digital healthcare in Myanmar**. By integrating AI, Blockchain, IoT, Telemedicine, and Cloud Computing into a unified ecosystem, the clinic is positioned to lead a new era of accessible, safe, and patient-centered care.

Vision: Delivering high-quality, technology-enabled healthcare services that strengthen community health across Myanmar.

Online Appointment System

Patients schedule consultations in minutes — selecting department, doctor, date, and time through a multilingual interface (English, Burmese, Thai).

Logistics & Supply Chain Management Strategy

SayTaMan PolyclinicCo.,Ltd.—Astructured approachtoprocurement, compliance, and operational logistics ensuring uninterrupted patient care.

OPERATIONAL EXCELLENCE

HEALTHCARE SUPPLY CHAIN

Strategic Procurement & Sourcing Model

A dual-track sourcing strategy balances quality, speed, and cost — ensuring the right supplies arrive at the right time.

Global Sourcing — Primary Medical Assets

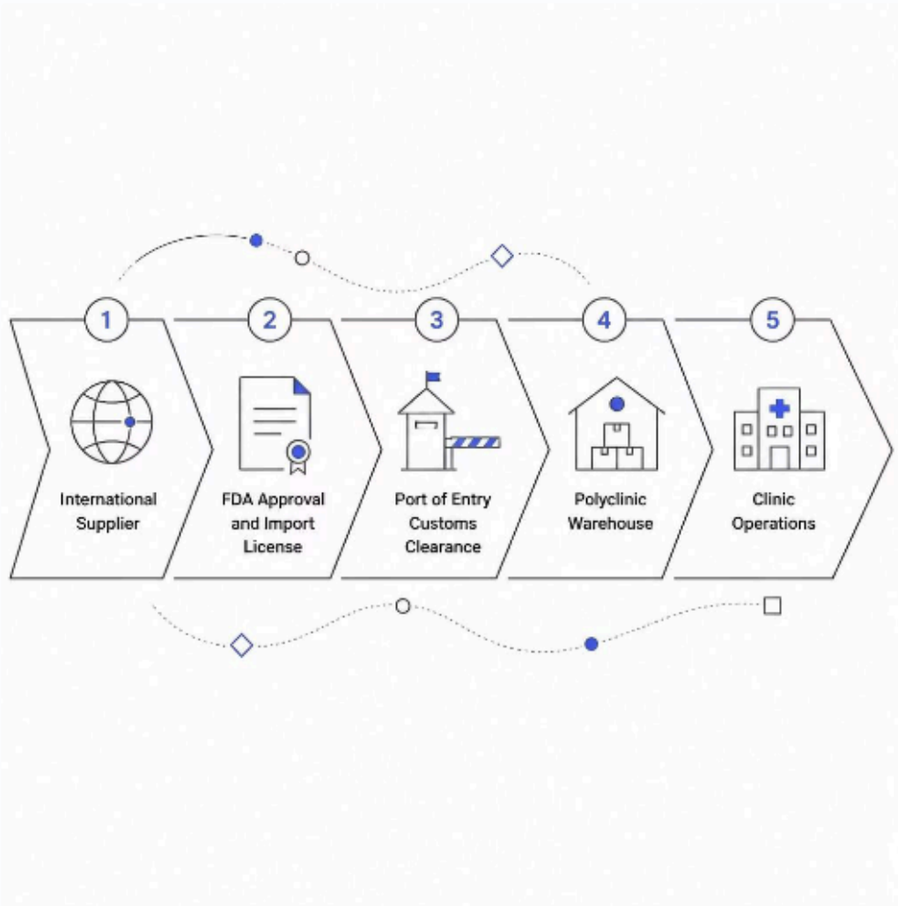

Advanced medical machinery — digital X-ray systems, ultrasound scanners, and specialized pharmaceuticals — imported directly from certified manufacturers in **Japan, Germany, and India**.

Local Sourcing — Operational Consumables

Daily-use items — syringes, gloves, sterile gauzes, PPE kits, and clinic furniture — procured from **verified local distributors in Myanmar** to minimize lead times and reduce inventory costs.

Regulatory Compliance & Inbound Logistics

All imported pharmaceuticals and medical devices must clear a structured regulatory pathway before reaching the clinic warehouse. Compliance is non-negotiable.

FDA Import Re c ommendation

Issued by FDA Myanmar prior to shipment.

Ministry of Commerce Lic ense

Official Import License required for all medical imports.

3PL Healthcare Freight Par tner

Experienced third-party logistics provider specializing in healthcare freight clearance.

Mode of Transport: Air vs. Ocean Freight

Transport mode is selected basedon urgency,costefficiency,andcargo sensitivity. Our 3PL partner manages both channels.

✈️ Air Freight

Speed: Fast / Urgent

Cost: Higher

Best for: Temperature-sensitive pharmaceuticals, critical spare parts, and time-critical shipments

🚢 Ocean Freight

Speed: Standard / Slower

Cost: Lower / Economical

Best for: Bulk shipments, heavy medical equipment, and clinic furniture

Operational Logistics & Inventory Management

Thelogisticsdepartmentensureseverypatientencounterissupportedbywell-maintainedequipmentandfullystockedsupplies.

Medical Supply Management

Stocking essential prescription medicines, vitamins, and healthcare products for the clinic pharmacy — with systematic replenishment cycles.

Equipment Maintenance & Care

Managing diagnostic tools — blood pressure monitors, glucose meters, thermometers — ensuring they remain calibrated and fully operational.

Inventory Control & Storage

Storing consumables — gloves, syringes, PPE — systematically in the clinic warehouse to prevent stockouts and maintain compliance standards.

ROADMAP

Strategic Direction

SAYTAMANisbuiltonapatient-centered,technology-first model — integrating digital tools at every stage of the care journey.

Smart Healthcare

Connected systems across all departments

EMR & HIS

Unified electronic health records

Online Appointments

Frictionless digital scheduling

Telemedicine

Remote consultations and monitoring

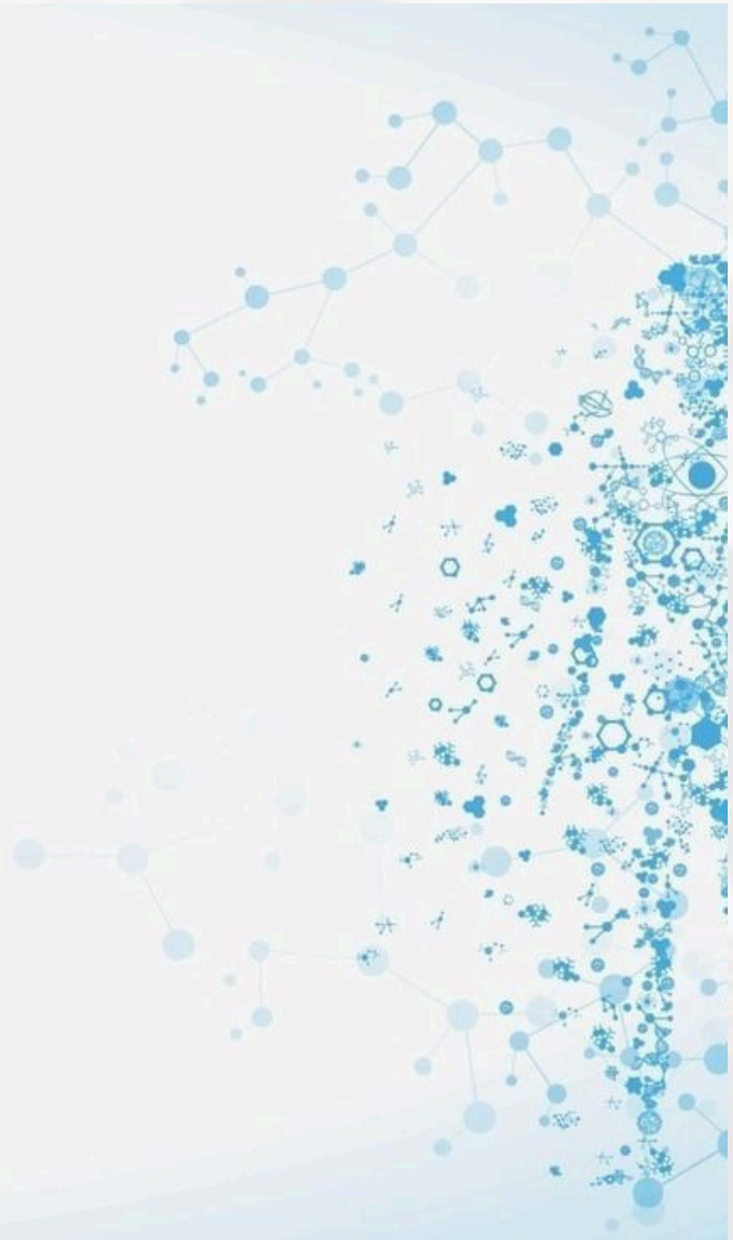

Digital Payment

Secure, seamless transactions

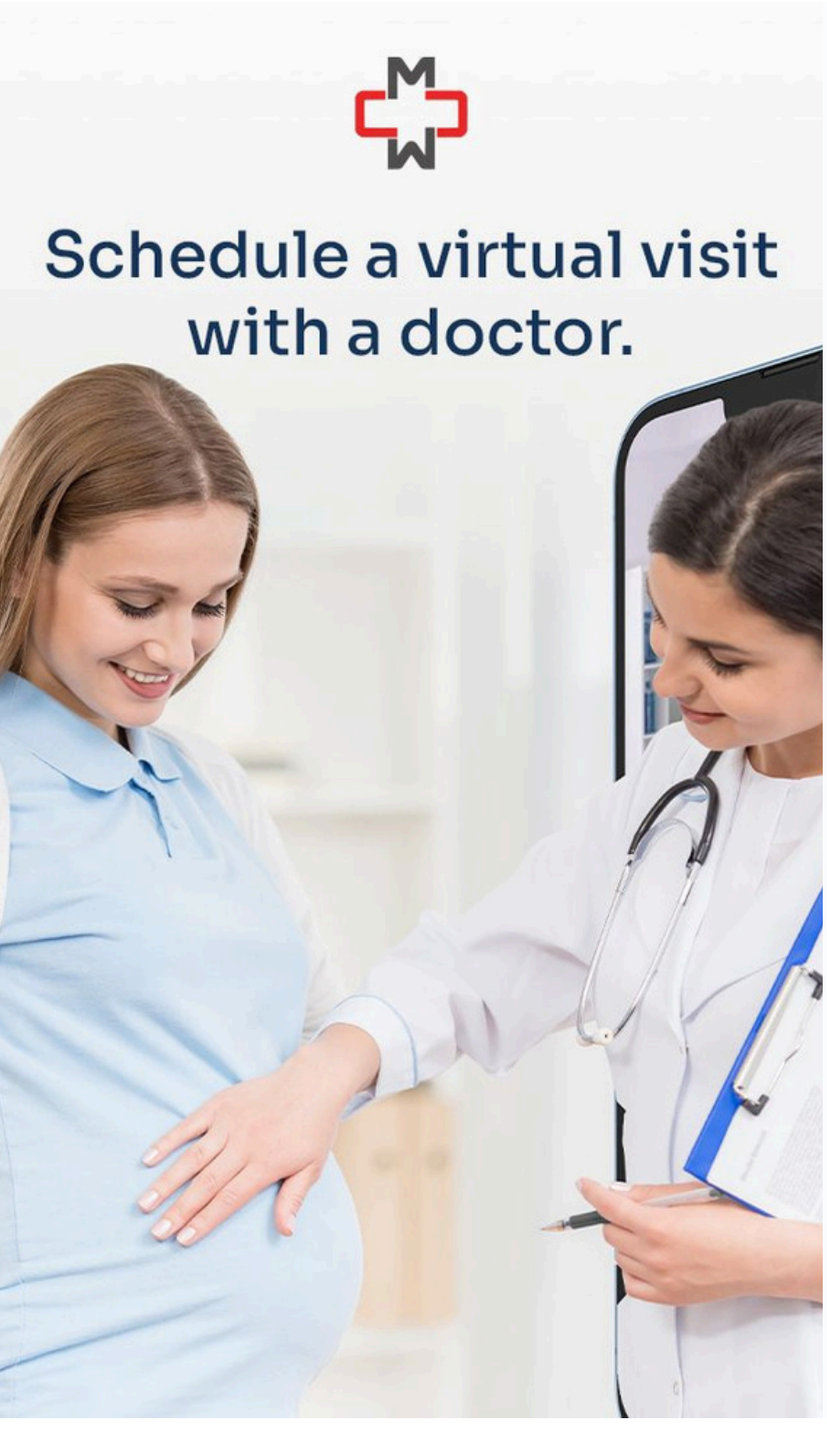

Patient-Centered Care

Personalized, compassionate experience

Benefits for Patients
Benefits for Doctors
Benefits for the Clinic

The Road Ahead: Future Technologies

Blockchain

Immutable, secure patient records and safe medical data sharing

IoT

Wearable devices feeding real-time health data directly into the EMR

VR & AR

Immersive training for clinicians and 3D visualization for diagnosis

AI & Big Data

Predictive analytics and intelligent decision support for better outcomes

Conclusion

SAYTA MANPolyclinic is committed to transforming healthcare in Myanmar through a strategic focus on modern services, digital innovation, and an enhanced patient experience, paving the way for future development into a leading smart healthcare ecosystem.

Modern Healthcare

Accessible, affordable, high-quality, patient-centered healthcare services

Digital Innovation

EMR, online appointments, telemedicine, digital payments, secure databases

Better Patient Exp erienc e

Reduce waiting times, improve efficiency, increase convenience, strengthen trust

Future Development

Expand digital capabilities, improve medical services, build smart healthcare ecosystem

To become a leading Smart Healthcare Provider in Myanmar and deliver convenient, affordable, high-quality, patient-centered healthcare services to the community.
